Introduction

Plan 9 From Bell Labs	7
<i>Rob Pike, Dave Presotto, Sean Dorward, Bob Flandrena, Ken Thompson, Howard Trickey, and Phil Winterbottom</i>	
An overview of the system; read at least this paper before you install.	
README	17
<i>Brian W. Kernighan</i>	
A view of the system for those familiar with UNIX.	
The Use of Name Spaces in Plan 9	27
<i>Rob Pike, Dave Presotto, Ken Thompson, Howard Trickey, and Phil Winterbottom</i>	
What's in a name?	
The Organization of Networks in Plan 9	37
<i>Dave Presotto and Phil Winterbottom</i>	
Connecting the pieces.	

Programming

How to Use the Plan 9 C Compiler	47
<i>Rob Pike</i>	
The starting point for C programming under Plan 9.	
APE — The ANSI/POSIX Environment	57
<i>Howard Trickey</i>	
Moving C code between UNIX and Plan 9.	
Alef User's Guide	67
<i>Bob Flandrena</i>	
A tutorial introduction to the concurrent programming language Alef.	
Alef Language Reference Manual	77
<i>Phil Winterbottom</i>	
The definitive Alef document.	
Acid: A Debugger Built From A Language	87
<i>Phil Winterbottom</i>	
An overview paper about the Acid debugger.	
Acid Manual	97
<i>Phil Winterbottom</i>	
The reference manual for the language and its libraries.	
Maintaining Files on Plan 9 with Mk	107
<i>Andrew G. Hume and Bob Flandrena</i>	
An introduction to Plan 9's replacement for make.	
Plan 9 Mkfiles	117
<i>Bob Flandrena</i>	
The conventions for using mk in Plan 9.	
A Manual for the Plan 9 assembler.	127
<i>Rob Pike</i>	
Things you'd rather not know.	

User Interfaces

8½, the Plan 9 Window System	137
<i>Rob Pike</i>	
An introduction to the window system and its unusual implementation.	
Rc — The Plan 9 Shell	147
<i>Tom Duff</i>	
An introduction to the new shell, complete with examples.	
The Text Editor sam	157
<i>Rob Pike</i>	
Sam is the standard editor on Plan 9.	
Acme: A User Interface for Programmers	167
<i>Rob Pike</i>	
A system with a more radical approach to programming and editing.	

Implementation

Hello World, or Καλημέρα κόσμε, or こんにちは世界	177
<i>Rob Pike and Ken Thompson</i>	
The details about Plan 9's character set: the Unicode Standard plus an ASCII-compatible encoding.	
Plan 9 C Compilers	187
<i>Ken Thompson</i>	
The design and some internals of the compiler suite.	
Adding Application Support for a New Architecture in Plan 9	197
<i>Bob Flandrena</i>	
The procedures necessary to add a new instruction set to Plan 9's programming environment.	
The Plan 9 File Server	207
<i>Ken Thompson</i>	
The design of the central file server and its novel backup system.	
The IL protocol	217
<i>Dave Presotto and Phil Winterbottom</i>	
A description of the IP protocol Plan 9 uses for internal communication.	
Process Sleep and Wakeup on a Shared-memory Multiprocessor	227
<i>Rob Pike, Dave Presotto, Ken Thompson, and Gerard Holzmman</i>	
A detailed study of a central issue in the Plan 9 kernel.	

Miscellany

Raster Graphics in Plan 9	237
<i>Tom Duff</i>	
The tools for playing with color images.	
A Quick Introduction to the Panel Library	247
<i>Tom Duff</i>	
A tour of a new toolkit for building graphical applications.	
A Guide to the Lp Printer Spooler	257
<i>Paul Glick</i>	
Administering the suite of tools to drive PostScript printers.	
Troff User's Manual	267
<i>Joseph F. Ossanna and Brian W. Kernighan</i>	
The old warhorse, updated for Unicode characters.	

Using SPIN	277
------------------	-----

Gerard Holzmann

An introduction to a tool for analyzing parallel and distributed programs.

Installation

The Various Ports	287
-------------------------	-----

The hardware requirements for the Plan 9 compilers and kernels.

Installing the Plan 9 Distribution	307
--	-----

Getting the system up and running, using a PC.
